SUMMARY

Motivated AI&ML engineering student with hands-on experience in API testing, automation scripting, and backend validation through a QA Automation internship. Skilled in Python, Java, Postman, Flask, scikit-learn, and SQL/NoSQL databases. Capable of building end-to-end applications, debugging automation workflows, and collaborating with teams to deliver reliable and scalable software solutions.

INTERNSHIP

ZOHO | AI & AUTOMATION TESTING

Oct 2025 – Jan 2026

- Improved the accuracy of an AI-based test script conversion system by analyzing failures and improving output accuracy.
- Validated machine-generated API automation, strengthening skills in AI output evaluation, debugging, and reliability analysis.
- Collaborated with developer teams to resolve issues, integrated AI-assisted testing into continuous pipelines for speed and reliability.

PROJECTS

AI-DRIVEN API TEST SCRIPT CONVERSION & VALIDATION SYSTEM | POSTMAN, OPENAI API, JAVASCRIPT, REST APIs,

NEWMAN, JENKINS | INTERNSHIP PROJECT

2025 - 2026

- Built an LLM-based system to convert Postman API test scripts, improving accuracy through prompt optimization
- Enabled automated regression runs via Jenkins CI for faster failure detection and continuous validation.

WEB-BASED AMBULANCE ETA PREDICTION SYSTEM |

FLASK, LEAFLET.JS, GEOPY, TWILIO API

2025

- Built a web application to predict ambulance ETAs and automatically notify traffic authorities for timely signal clearance.
- Added interactive mapping and real-time route calculations to improve emergency response coordination and traffic management.

AUTOMATED PNEUMONIA DETECTION USING DEEP LEARNING | PYTHON, TENSORFLOW/KERAS, OPENCV, NUMPY,

MATPLOTLIB

2025

- Built a MobileNetV2 deep learning model for Pneumonia vs. Normal X-ray classification with Grad-CAM interpretability.
- Optimized the model to achieve 87% accuracy and efficient performance for resource-constrained environments.

NEWMAN-JENKINS OUTPUT COMPARISON TOOL |

LOVABLE.AI, JAVASCRIPT - QA UTILITY TOOL (SELF-BUILT)

2025

- Built a Lovable.ai tool with custom logic to compare Newman Jenkins console outputs of old vs. new Postman scripts, displaying request counts and pass/fail results in a simple UI.
- Automated Excel report generation to speed up QA validation and quickly identify mismatches between script versions.

EDUCATION

RAJALAKSHMI INSTITUTE OF TECHNOLOGY

B.E IN AI & MACHINE LEARNING

2023 – Present | Poonamallee

CGPA: 8.88

IIT, MADRAS

B.S IN DATA SCIENCE

2023 - Present | Chennai

GRACE MATRIC. HR. SEC. SCHOOL

CLASS 12 | PERCENTAGE: 95%

Completed March 2023 | Chennai

SKILLS

PROGRAMMING

C • Python • Java • JavaScript • HTML/CSS

DATA VISUALIZATION & DATABASES

Pandas • NumPy • Matplotlib • Seaborn • Power BI • Excel • MySQL • MongoDB

MACHINE LEARNING, NLP & OTHERS

scikit-learn • TensorFlow/Keras • NLTK • Prompt Engineering • Flask • Git • GCP

QA & AUTOMATION

API Testing • Postman • JS Test Scripting • Jenkins(CI/CD) • Log Analysis & Debugging

AI TOOLS FOR CODING & RESEARCH

ChatGPT • Lovable • Cursor • GitHub Copilot • Claude • Perplexity

SOFT SKILLS

Effective Communication • Critical & Creative Thinking • Adaptability • Problem Solving • Teamwork

RESEARCH

AI-Powered Government Scheme

Recommender: A Public

Administration Digital Transformation

Tool | June 30, 2025

IIPA Southern Regional Conference, Puducherry

- Proposed an AI-driven welfare scheme recommender with personalized eligibility matching, multilingual chatbot support, real-time API integration, and DPDP/GDPR-compliant, fair, and transparent service delivery.
